ALWIC

BRING YOUR SPACE TO LIFE WITH INSPIRED WINDOW ARCHITECTURE

Established in 1979, our company provides a refined blend of attractive window construction influenced by Japanese design. We operate under a six-region global management structure and proudly represent a 100% Indian collaboration with Bhoruka in Mysore. Our hardware is directly imported from Japan, ensuring the highest quality

KEY POINTS

- We rank among the world's top 10 leading aluminum brands.
- Our products integrate cutting-edge Japanese technology and hardware
- Our windows offer exceptional sound insulation, water tightness, and air infiltration resistance.
- The IWIN-S model boasts impressive wind load performance, withstanding up to 2,500 Pa

SUITABLE FOR

- Individual residences
- High rise buildings
- Villas and resorts

NOT SUITABLE FOR

- Heights exceeding 9 feet
- Telescopic doors
- Bi-foldable doors
- Minimal systems

ALWIC

WINDOW DESIGNS THAT TRANSFORM YOUR ENVIRONMENT

As a global leader, we deliver you the highest standard of excellence, supported by cutting-edge US technology and certifications. Our commitment to perfection is evident in every detail, from concealed frames that optimize your view to large opening options that enhance your living space. With invisible drainage and effortless maintenance, we ensure that your windows simplify your lifestyle.

KEY POINTS

- Slimline certified American brand renowned for its excellence.
- Incorporating American technology and hardware for superior performance.
- Offering exceptional sound insulation and water tightness.
- Features concealed frames to optimize your view.
- Provides large opening options and invisible drainage for easy maintenance.
- Concealable frames on all four sides, with a 20mm bottom frame.
- Impressive wind load performance of up to 3000 Pa.

SUITABLE FOR

- High-rise buildings, residences, and villas/resorts.
- Ideal for slim pivot doors, concealed insect mesh, trackless floors, floating corners, seamless railings, pergolas, slide and fold doors, internal partitions, and convertible casements.

NOT SUITABLE FOR

- Very small windows.
- Sliding configurations are not recommended for heights exceeding 12ft.

DISCOVER YOUR IDEAL WINDOW STYLE

Introducing our high-performance window systems, crafted to meet the demands of domestic use. With a weighted and curved design, these windows offer both functionality and aesthetic appeal. Equipped with multi-locking points, they ensure security and peace of mind. What sets them apart is their lightweight construction, providing ease of use without compromising on durability.

Additionally, our solutions are designed to be affordable, making quality accessible to all.

Window Style that Justifies Your Aspiration - High-Performance, Functional Systems for Domestic Use

KEY POINTS

- European system tailored for India, ensuring optimal performance.
- Provides excellent sound insulation, water tightness, and air tightness.
- Features a slim interlock and requires low maintenance.
- Offers affordability without compromising quality.

SUITABLE FOR

- Individual residences
- Villas
- High-rise buildings
- Commercial buildings

NOT SUITABLE FOR

- Sliding doors exceeding 9 feet in height
- Pivot doors
- Bi-fold doors
